Danilo Dante Siqueira

Full Stack Developer

Curitiba, PR, Brazil | danilodantesiqueira@gmail.com
github.com/danilosiq | linkedin.com/in/danilo-dante-siqueira-1a31a7234

PROFESSIONAL SUMMARY

Full Stack Developer with experience building web and mobile applications using React, Next.js, React Native, TypeScript, and Node.js. Works on real-time communication, REST API integration, and automated testing. Contributes to messaging and in-app notification solutions through user flows, product thinking, and design in collaboration with technical teams.

TECHNICAL SKILLS

Front-end: React, Next.js, React Native, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Expo, React Query, Radix UI, Zod.

Back-end and integration: Node.js, Prisma, REST APIs, WebSocket, HTTP, FileMaker.

Quality and delivery: Unit and E2E testing, Git, GitHub, GitFlow; exposure to AWS and Docker.

Product and collaboration: Figma, UX/UI, Design Systems, Storybook, Jira, Trello, Shortcut, Slack, Scrum, Kanban, Codex, and Spec-Driven Development.

PROFESSIONAL EXPERIENCE

Exban | Full Stack Developer | CLT employment (Brazil)

Curitiba, Brazil | Feb 2026 - Present

- Enabled real-time communication on the internal platform by developing chat features with React, TypeScript, Node.js, Prisma, and WebSocket.
- Contributed to the design of messaging and in-app notification solutions, defining user flows, product requirements, and Figma designs with the technical team.
- Implemented automated unit and E2E tests to verify application behavior and support reliable releases.
- Incorporated Codex and Spec-Driven Development to support AI-assisted delivery based on specifications. Collaborated with product and engineering through Jira, Scrum, and Kanban.

Ibolt | Front-end Developer Intern

Curitiba, Brazil | May 2025 - Jan 2026

- Addressed web and mobile usage needs through responsive interfaces with React, Next.js, TypeScript, and Tailwind CSS and mobile applications with React Native and Expo.
- Integrated business logic with FileMaker to support internal process optimization, collaborating in an agile team using Git, GitHub, and GitFlow.

Nau! SaaS | Front-end Developer

Remote | Jan 2024 - Jan 2025

- Connected web and mobile interfaces to back-end services through REST APIs using React Native, Expo, Next.js, and TypeScript.
- Redesigned interfaces from Figma and applied Tailwind CSS to support different screen sizes; coordinated tasks with the team through Shortcut and Slack.

EDUCATION

Bachelor's Degree in Software Engineering (in progress) | Centro Universitário UniOpet

Jan 2023 - Ongoing
